PROFESSIONAL SUMMARY

Software Engineer with 4+ years building production frontend and full-stack applications for enterprise and fintech clients, including JPMorgan Chase. Experienced in React.js, TypeScript, and Flutter, with a track record of improving performance, shipping reusable component libraries, and delivering high-visibility features under deadline pressure.

PROFESSIONAL EXPERIENCE

Software Engineer | Virtusa (Client: JPMorgan Chase & Co)

Jun 2025 – Present

Bangalore, India

- Architected and delivered the frontend of the RE-Write enterprise application using React.js and TypeScript, establishing a scalable, maintainable codebase for JPMorgan Chase.
- Designed a modular routing architecture that improved application navigation efficiency and enabled seamless integration of independent feature modules.
- Optimized asynchronous file upload and retrieval workflows through efficient API integration, improving document management performance by 25%.
- Built a reusable UI component library adopted across the team, cutting development time for new features by 30% while maintaining cross-platform responsiveness.
- Implemented robust state management and TypeScript abstractions that improved application reliability and developer productivity in an Agile environment.

Software Development Engineer 2 | Calibraint

Jan 2025 – Apr 2025

Chennai, India

- Developed a decentralized crypto wallet in Flutter, implementing BIP39 standards for secure mnemonic-based account recovery.
- Strengthened application security by integrating Google OAuth and encrypting private keys via Flutter Secure Storage.
- Optimized app architecture for production-scale traffic, ensuring low-latency interactions with blockchain networks.

Associate Software Engineer | Tekion

Jun 2022 – Jan 2025

Chennai, India

- Led development of CRM campaign applications for high-profile enterprise events (NADA Los Angeles), driving a 30% increase in lead generation and business opportunities.
- Received the CEO Award for exceptional contributions to the NADA event, delivering critical features under tight deadlines.
- Built a mobile-first Support Portal with real-time tracking features, improving customer ticket resolution efficiency.
- Partnered with design teams to overhaul UI/UX, boosting support staff productivity by 20% and improving customer satisfaction scores.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Dart, Go, SQL

Frameworks & Libraries: React.js, Redux, Flutter, GIN (Go), Node.js

Infrastructure & Tools: Docker, Git, Firebase Auth, Chrome Extension APIs, JWT

Databases: MongoDB, PostgreSQL, Firebase, Hive (Local Storage)

AI & Productivity: GitHub Copilot, Antigravity, ChatGPT, Gemini

EDUCATION

Bachelor of Engineering, Electronics and Communications | Sri Lakshmi Ammal Engineering College

Sep 2017 – Sep 2021

Chennai, India

- Graduated with First Class Honors (82.9%). Active member of technical workshops and symposiums.

HONORS & PROJECTS

- NADA Project – Top Contributor: Recognized as a Top Contributor for outstanding performance delivering CRM campaign applications, directly contributing to the project's success.
- Xpense (Personal Finance Tracker): Built a full-stack Flutter and Go application with Firebase integration as a comprehensive budget management tool.
- AI-Powered Chat App (Hackathon): Engineered an 18-hour real-time chat solution featuring an AI summarizer to optimize group communication.
